Summary

Mechanical Design Engineer and current Master of Engineering Management candidate at La Trobe University with 2+ years of experience in CAD drafting, technical documentation, and manufacturing support. Skilled in AutoCAD, SolidWorks, and engineering layouts with strong attention to precision, safety, and process optimisation.

Experience

Associate Mechanical Engineer – Aryan Enterprises

Kathmandu, Nepal | July 2021 – July 2023

- Developed mechanical components and engineering layouts using AutoCAD and SolidWorks by applying parametric design principles and assembly constraints to meet client technical requirements
- Generated high-precision technical drawings and manufacturing documentation for production teams through detailed measurements, engineering standards, and interference checking
- Reduced design iteration cycles by supporting model modifications, documentation control, and downstream impact assessments during engineering changes

Precision Production Operator – Peuker & Alexander

Melbourne, Australia | November 2024 – Present

- Operate and maintain industrial cutting machinery while ensuring compliance with workplace safety and quality standards
- Perform precision timber cutting based on technical specifications, measurements, and production requirements
- Conduct quality inspections and collaborate with production teams to achieve operational efficiency and production KPIs

Demolition Labourer – Expert Demo

Melbourne, Australia | September 2023 – October 2024

- Supported site operations, structural dismantling, and material handling within strict workplace safety procedures
- Assisted with equipment handling, site preparation, and maintaining organised and compliant work environments
- Collaborated effectively with team members to complete projects safely and efficiently under demanding site conditions

References can be obtained upon request.

Education

Master in Engineering Management

July 2023 – July 2025

La Trobe University, Melbourne

Bachelor in Mechanical Engineering

Feb 2014 – Dec 2018

Visvesvaraya Technological University, India

Side Projects

Biofuel Production Project – Student Programme (SPP)

Organized by Karnataka State Council for Science and Technology

- Participated in the design and fabrication of a machine to convert plastic waste into gas and fuel
- Assisted in fabrication, assembly, and testing of the system using sustainable engineering concepts
- Presented the project at a seminar held at Bapuji Institute of Engineering and Technology on 10–11 August 2018

Work Rights In Australia

Full-Time up to March 2028

(Graduate Visa- 485)

Languages

Nepali, English (59 in PTE)

Volunteering & Leadership

President – Mechanical Engineering Club, Visvesvaraya Technological University:

- Led student activities and coordinated technical events within the department
- Supported organization of seminars, workshops, and student technical programs
- Assisted in academic and extracurricular engineering activities during undergraduate studies
